

# Endodontic referrals at Billingshurst Dental Practice

- Kate de Groot has been an associate at Billingshurst for 12 years. In 2015 she completed a 2 year Endodontic Diploma from the Eastman Dental Hospital. Since then she has been taking referrals for Endodontic cases.
- New referrals will be seen within 2 weeks for an initial consultation.
- Emergency appointments will be made available the same week for patients with pain or swelling.
- All patients will be referred back to the referring Dentist for permanent restoration of the tooth.
- More information can be found on our website [www.billingshurstdental.co.uk](http://www.billingshurstdental.co.uk)
- All treatment will cost £650 which includes a £60 initial consultation fee. 50% deposits are required if treatment is accepted.

# Testimonials

1. I was referred to Kate by my dentist who felt I needed specialist root canal treatment. From the start to the end of the process I felt Kate and her team always were 100% professional and kept me informed of exactly what they were doing at all times. It is a worrying thing this kind of treatment but the process was made easier by the constant assurances from Kate and I felt I could trust that at all times. I would have no hesitation in going back if required and wish her and her practice all the very best. I can highly recommend.
2. My tooth is still in place and so far hasn't caused me any further problems. I was very impressed with the whole experience and your level of patience with such an intricate procedure! It was also completely painless.
3. The treatment received for root canal treatment by Kate was carried out to a very high standard. All the steps in the procedure were explained clearly, and I was made as comfortable as possible throughout each appointment. The outcome of the treatment has been very successful – I have had no further problems and can now eat as normal on the crown that was placed following the root canal treatment.

# Testimonials

4. Never having had a lot of major work done on my teeth in over 40 years, I was extremely nervous about the prospect of root canal. The whole process was thoroughly explained to me and the work was carried out exactly how explained, the actual work itself whilst a little uncomfortable was pain free. The irritating tooth ache that had been building up over 6-9 months has gone, what a relief and thank you.
5. I was referred by my own Dentist for root canal treatment of my upper molar as my Dentist couldn't do it. Kate put me at ease and made me feel very relaxed. The treatment was pain free and I would definitely see Kate again for root canal treatment.
6. I experienced a very professional and friendly service for my recent root canal treatment by Kate. Everything was explained clearly to me and the procedure went well, I even got the chance to nod off a couple of times. I would highly recommend Kate to my friends and colleagues for root canal treatment.
7. My dental problem was a very challenging one but Kate operated in a highly skilled, diligent, caring and reassuring manner. I would not hesitate to recommend her.
